Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method of reading an identifying mark on an ophthalmic lens, classified in class 356, subclass 124.
- II. Claims 7-12, drawn to a method of obtaining a thickness of an ophthalmic lens, classified in class 356, subclass 630.
- III. Claim 13-21, drawn to a method of detecting an angular position of an ophthalmic lens, classified in class 356, subclass 136.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as reading an identifying mark on a lens, invention II has a separate utility such as obtaining a thickness of a lens, and invention III has a separate utility such as detecting an angular position of a lens. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, the search required for Group II is not required for Group I and III and the search for Group III is not required for Group I and II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

During a telephone conversation with Stephen Burr on 11/14 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Burr on 11/17/05.

This application was in condition for allowance except for the presence of claims 7-21 to an invention non-elected with traverse.

The application has been amended as follows:

Claims 7-21 have been canceled.

Drawings

The drawings (replacement sheet figure 4) filed on 11/14/05 have been approved.

Reasons for Allowance

Claims 1-6 allowed.

Collins et al (5,633,504) teach of a method for detecting defects on an ophthalmic lens using fluorescent lighting.

As to claims 1-6, the prior of record, taken alone or in combination, fails to disclose or render obvious a method of reading an identifying mark in the form of a character, a figure, or a symbol which is formed in a predetermined portion of a surface of an ophthalmic lens comprising the steps of irradiating g said lens with an excitation light, taking a fluorescent image of said lens and obtaining information on said lens by reading said identifying mark based on said fluorescent image, in combination with the rest of the limitations of claim the rest of the limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
